CARRIER'S RECOMMENDATION REGARDING CARRIAGE OF LIVE PLANTS

It is generally agreed that live plants do not travel well in ocean carriage. Carrier does not recommend ocean carriage of live plants in non-atmospheric controlled dry containers as such carriage would constitute insufficiency of packing. Rain, humidity, heat, and delay caused by scheduling, mechanical breakdown, or any number of unforeseen circumstances can have adverse effect on live plants. Carrier shall in no circumstances be liable for direct, indirect or consequential loss or damage caused by delay or insufficiency of packing. Against Carrier's recommendation, Shipper or Consignee ("Merchant") has instructed Carrier to carry live plants in non-atmospheric controlled dry container(s) and Carrier agrees to do so only at the total risk of the Merchant.

Acknowledged for **current and all future** shipments by Merchant:
