

Hold Harmless Waiver – Non-Operable Vehicles

Please Note: Tropical Shipping does not accept non-operable Electric and Hybrid Electric Vehicles (EV, HEV, PEV, PHEV).

Before delivering a non-operable vehicle, please contact the Customer Service Department at 800-638-8767 / 561-881-3999 to confirm that a non-operable vehicle can be accepted at the final destination. Additional fees for non-operable vehicles will apply.

I have been advised that the vehicle I wish to ship through Tropical Shipping has been classified as “non-operable” due to the following conditions (please check all that apply):

- Cracked or damaged windshields or windows
- Flat, missing or damaged tires or wheels
- Leaking fluids
- Deployed airbags
- Non-functioning brakes
- Unable to stay running under its own power source
- Out of fuel/gas
- Other: _____

I understand that vehicles in the above conditions cannot be driven safely by Tropical Shipping employees and must be mechanically lifted directly into a container. I have also been advised that an additional fee will be charged for this service.

Reasonable effort will be made to load vehicles under this classification with care; however Tropical Shipping is not liable for damage that may result from mechanically lifting the vehicle.

I agree to indemnify and hold harmless Tropical Shipping from and against all claims, loss, damage and expenses stemming from the aforementioned operation. This shipment is **not eligible** for insurance.

I further to agree to pay Tropical Shipping for any damage done to any Tropical Shipping equipment or property including but not limited to the containers involved. I agree that any such charges may be invoiced on the Bill of Lading applicable to the ocean carriage of the involved cargo.
